

# CIE CPD Programme 2024

Join us for a journey into the world of super prime kitchen design

CIE CPD  
Programme  
2024

Seminar 1  
**CIE**  
LONDON

The Art of Super Prime Kitchen Design

We provide an insight into the kitchen design principles and guidelines applied to every Super Prime Residential project.

. The CPD investigates the concept of Super Prime kitchen design and the implications upon the product and design approach. Using Case Studies, we identify essential factors to consider when designing Super Prime residential kitchens

Seminar 2  
**bulthaup**

We look at bulthaup's history and values, and explore the premium kitchen production technologies of their material

The CPD gives an insight into the individual planning expertise of kitchen living spaces with particular focus on the Project Market

Seminar 3  
**CIE**  
LONDON

CIE Trend Analysis 2024/25  
Design Well while Doing Good

We provide detailed Trend Analysis for future Super Prime Developments and where we see focus on key material trends, where these come from, validation of the data and an understanding of how these product decision define your development.

# The Art of Super Prime Kitchen Design

Within 'The Art of Series' the key aim is to provide you with an insight into the kitchen design principles and guidelines applied to every Super Prime Residential project

## Key Objectives:

1. Understand the concept of Super Prime kitchen design and its implications for product and design approaches
2. Identify essential factors to consider when designing Super Prime residential kitchens, including furniture, appliances and stone specifications
3. Recognise the role of sustainability in influencing design choices for Super Prime kitchens and its positive impact
4. Explore specific examples of Super Prime residential kitchen designs to gain insights into expert approaches and innovative ideas

CPD Seminar 2

# bulthaup Living Spaces

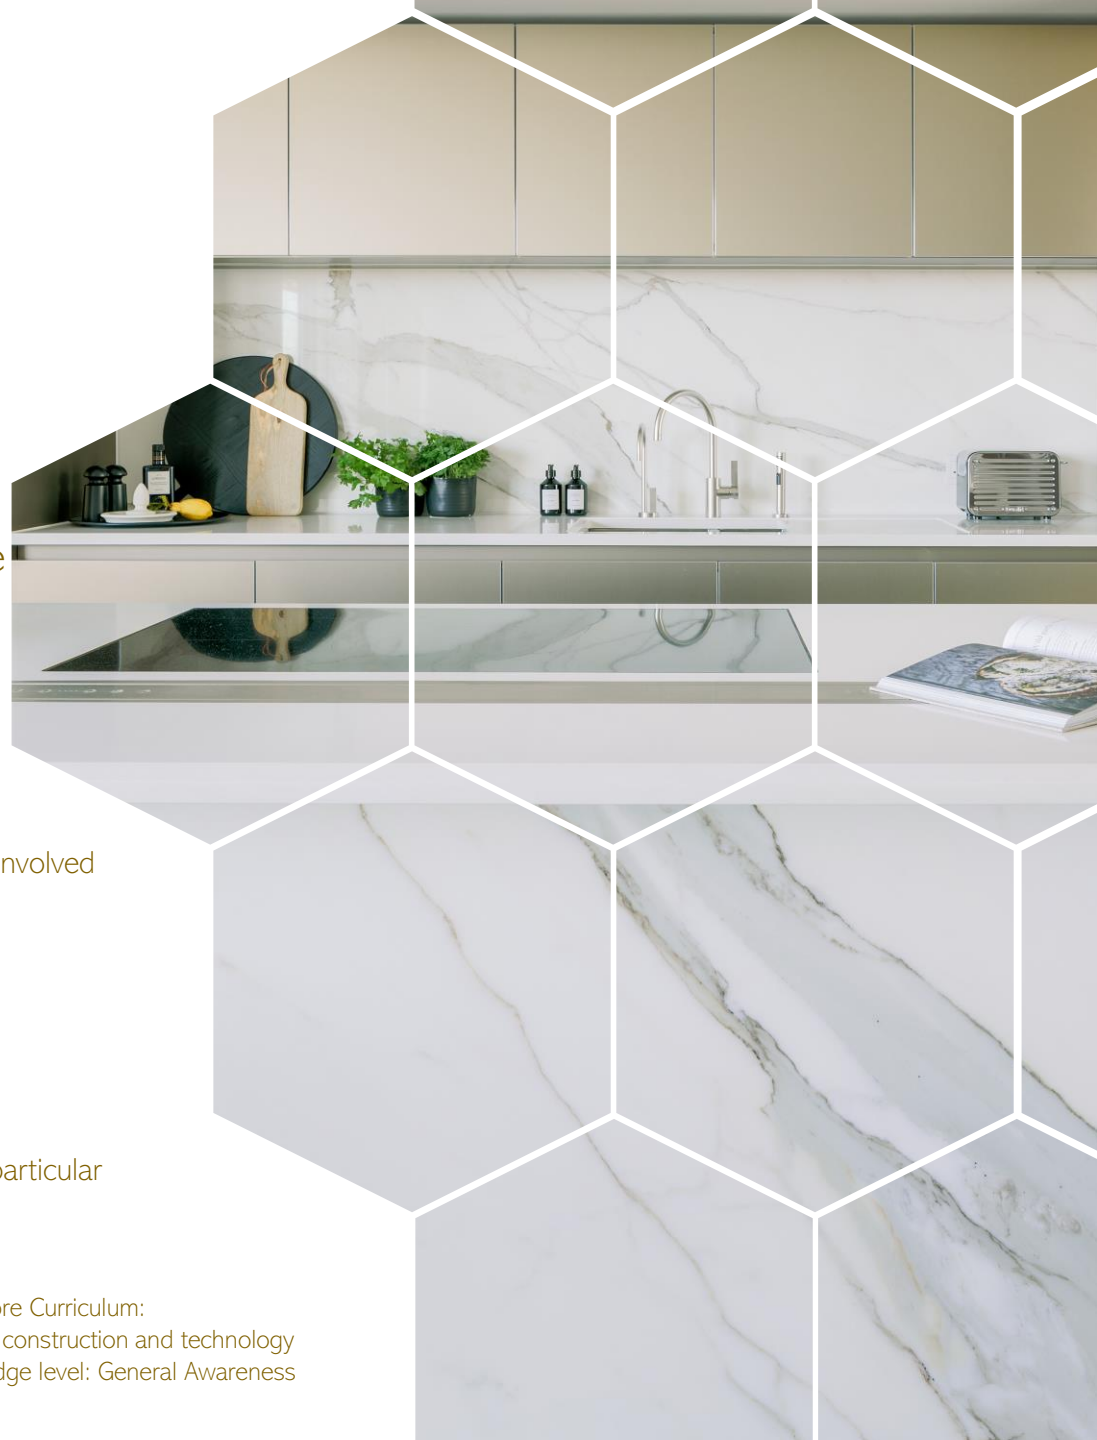

For over 70 years, bulthaup has delivered its own unique brand of design precision: unmistakable kitchen and living spaces planned holistically to complement the individual requirements of both building and client.

Key Objectives:

An exploration of premium kitchen production technologies and materials involved in the production of

- veneer / solid wood
- laminate
- lacquer
- aluminium
- laser edge welding
- monobloc manufacturing

Insight into the individual planning expertise of kitchen living spaces with particular emphasis of the project market.

CIE65  
LONDON

RIBA Core Curriculum:  
Design, construction and technology  
Knowledge level: General Awareness

# CIE Trend Analysis

Our 65 year in business has evoked a deep dive into our design history to examine what makes a design stand the test of time

We provide detailed Trend Analysis for future Super Prime Developments and where we see focus on key material trends, where these come from, validation of the data and an understanding of how these product decision define your development.

## Key Trend Indicators Examined

- 2024/25 – Design Well while Doing Good
- Touch and Feel – Sensory Experiences
- 3D Surfaces – Texture, texture & texture
- Natural world and our wellbeing
- Tangible Craftsmanship – The passion for authenticity and the Craftsman
- Classical the route to Sustainability?
